SUMMARY

I'm a Telecommunications Engineering student at Telkom University with hands-on experience in machine learning, data analysis, and telecommunications systems. Experienced in developing data-driven projects, including a machine learning-based "Fake BTS" detection system, and conducting network performance analysis using tools such as Nemo and QGIS. Proven ability to lead and mentor through roles as a practicum coordinator and assistant lecturer, with a strong interest in applying AI and data solutions in the telecommunications and technology industry.

EDUCATIONS

Telkom University, Bandung, Indonesia 2022 - Present

Bachelor of Telecommunication Engineering

Relevant Courses: Cyber Security and AI/ML

GPA: 3.80/4.00

- Awards: Gold Medal in Indonesian Youth Science Olympiad Competition in Physics, Elimination Round National Level ONMIPA-PT (Olimpiade Nasional Matematika dan Ilmu Pengetahuan Alam Perguruan Tinggi) Competition in Physics.

Mitra Industry MM2100 Vocational High School, Bekasi, Indonesia 2018 - 2021

Electronical Industry

Relevant Courses: Electrical Circuit and Programming

Score: 86/100

- Award: 2nd Place in Pasanggiri Angklung Sekolah Satu Hati 2019.

PROFESSIONAL EXPERIENCES

Telkom University Laboratory, Bandung, Indonesia Apr 2025 – Apr 2026

Digital Signal Processing Laboratory Assistant

- Led the practicum division, including conducting Training of Trainers (ToT) sessions, while assisting and guiding 200+ students in understanding DSP concepts and MATLAB-based simulations.
- Prepared and supervised laboratory materials (modules, assignments, tests, and MATLAB programs) and managed student assessments, including grading and performance evaluation.

FTE Telkom University, Bandung, Indonesia Feb 2025 – Jan 2026

Continuous and Discrete Time Signal Processing Assistant Lecturer

- Delivered weekly teaching sessions (2 credit hours) for 40+ students per class, explaining continuous and discrete signal processing concepts.
- Designed and provided practice problems to support students preparation for midterm (UTS) and final (UAS) examinations.

Telkomsel, Jakarta, Indonesia Jul 2025 – Aug 2025

Service Quality Assurance Intern

- Conducted field testing activities, including Walk Test (WT) and Customer Experience Testing (CET), to evaluate network performance and newly deployed antenna sites.
- Analyzed network coverage using Nemo and QGIS and developed a machine learning-based "Fake BTS" detection project for identifying anomalous network signals.

Coding Camp 2025 Powered by DBS Foundation, Bandung, Indonesia Feb 2025 – Jun 2025

Machine Learning Engineer Cohort Students

- Completed 5+ projects in machine learning and data analysis using Python, covering data preprocessing, exploratory data analysis (EDA), and basic model development.

- Participated in 19 instructor-led training (ILT) sessions, including 7 technology sessions, 7 soft skills sessions, 2 English sessions, and 3 financial literacy sessions.
- Developed a final project titled “SmartBoard: Face Recognition System for KCIC High-Speed Rail Boarding”, focusing on computer vision-based identity verification.

Bootcamp LG CNS X Tel-U, Bandung, Indonesia

Aug 2024 – Sep 2024

Participants

- Completed 31 hands-on projects, including: 11 C# projects (1 final project), 10 Java projects (1 final project), and 10 Oracle & web server projects (2 final projects), focusing on OOP, database integration, and backend development.
- Selected as one of the top participants among 40+ students and recommended to proceed to the interview stage at LG CNS Group.

Telkom University Dormitory, Bandung, Indonesia

Sep 2023 – Jul 2024

Senior Residents XI

- Participated in 10+ internal and external programs, contributing to student development activities both within and beyond campus.
- Led and mentored 150+ first-year students in a dormitory building, fostering discipline, communication, and positive character development.

HMTT Telkom University, Bandung, Indonesia

Feb 2023 – May 2024

Physics Tmentor

- Guided students in physics courses through structured mentoring and feedback, improving their understanding of fundamental concepts.
- Managed student learning activities, including attendance tracking, assignment evaluation, and performance assessment.

Denso Indonesia, Bekasi, Indonesia

Jun 2021 – Jul 2022

Quality Operator

- Initiated 20+ Kaizen improvements annually and conducted weekly performance evaluations, identifying process inefficiencies and proposing actionable improvements.
- Performed quality control on production outputs to ensure compliance with standards, preventing defective products from being shipped to customers.

PROJECTS

- Developed a machine learning-based Fake BTS detection system to identify anomalous network signals using telecommunications data.
- Developed a face recognition system (SmartBoard) for high-speed rail boarding using computer vision techniques for identity verification.
- Developed an unattended automation robot using UiPath to streamline Posyandu data reporting to healthcare centers.

SKILLS & CERTIFICATIONS

Programming & Data: Python, SQL, MATLAB, C

Machine Learning & Data Analysis: Data Preprocessing, Exploratory Data Analysis (EDA), Basic Machine Learning, Computer Vision (Deep Learning), Machine Learning Pipeline.

Telecommunications & Networking: Network Analysis, Drive Test (DT), Walk Test (WT).

Tools & Technologies: Nemo, QGIS, Wireshark, Google Colab, Visual Studio Code, SSMS, UiPath.

Others: MS Office, Google Sheets, Canva

Certifications: 10+ certifications in Machine Learning, Data Analysis, and Cloud Computing (including Alibaba Cloud ACA and Dicoding courses)
